

Project Title: Measuring the Pulse of Prosperity

An Index of Economic Freedom

1. INTRODUCTION

1.1 Project Overview

Economic freedom reflects the ability of individuals to control their labor, property, and financial decisions. This project focuses on analyzing the Index of Economic Freedom to assess and visualize how freely individuals and businesses can operate across countries.

1.2 Purpose

The purpose of this project is to offer a data-driven perspective on economic liberty globally, highlighting the factors that influence economic freedom and enabling comparative insights through visual dashboards.

2. IDEATION PHASE

2.1 Problem Statement

Many people around the world suffer due to limited economic freedom, affecting their standard of living and opportunities. There is a need to quantify and visualize economic freedom to inform decisions and foster development.

2.2 Empathy Map Canvas

- *Think*: Economic fairness and liberty are essential for growth.
- *Feel*: Frustrated with inequality.
- *Say*: Economic freedom should be a global right.
- *Do*: Analyze, visualize, and advocate for improvement.

2.3 Brainstorming

Key focus areas were identified: governance, regulatory efficiency, trade openness, and financial freedom. The idea was to use visual tools to represent the economic landscape clearly.

3. REQUIREMENT ANALYSIS

3.1 Customer Journey Map

User accesses dashboard → views visualized data → interprets economic conditions → shares/report insights.

3.2 Solution Requirement

- Tools: Python, Pandas, Matplotlib, Seaborn, Plotly
- Platform: Jupyter Notebook
- Dataset: Heritage Foundation Index of Economic Freedom

3.3 Data Flow Diagram

Data Source → Preprocessing → Analysis → Visualization → Dashboard

3.4 Technology Stack

- Programming Language: Python
- Libraries: Pandas, Seaborn, Matplotlib, Plotly
- Deployment: GitHub

4. PROJECT DESIGN

4.1 Problem-Solution Fit

Data on economic freedom exists but is underutilized. A visual and interactive approach makes it more engaging and understandable.

4.2 Proposed Solution

A structured dashboard displaying country-wise economic scores and related indicators, helping identify trends and gaps.

4.3 Solution Architecture

Data Ingestion → Processing → Feature Extraction → Visualization → Output Display

5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

- Week 1: Dataset exploration and cleaning
- Week 2: Exploratory data analysis
- Week 3: Visualization building
- Week 4: Dashboard integration and testing

6. FUNCTIONAL AND PERFORMANCE TESTING

6.1 Performance Testing

The visualizations were tested for load time and rendering. The dashboard performed smoothly with minimal latency.

7. Code

```
<div class='tableauPlaceholder' id='viz1750918482746' style='position: relative'>

8.3 STORY

9. ADVANTAGES & DISADVANTAGES

Advantages:

- Easy to understand visuals
- Informs economic policies and decisions
- Comparative global perspective

Disadvantages:

- Static data, no real-time updates
- Limited to the dataset's scope and accuracy

10. CONCLUSION

This project successfully analyzed and visualized the Index of Economic Freedom. It showcased the global disparity in economic liberty and emphasized the importance of governance and openness in national progress.

11. FUTURE SCOPE

- Incorporate real-time economic data streams
- Add prediction models for future trends
- Extend dashboard with more interactive filters
